

# AutoCorrect Mac Command Line Installation

Last Modified on Wednesday, 31-Jan-2024 10:14:29 GMT

To install via commandline:

```
sudo installer -pkg "path/to/AutoCorrect.pkg" -target /
```

To set the license key, for each user:

```
defaults write com.texthelp.AutoCorrect Serial -string "[product-code]"
```

e.g. defaults write com.texthelp.AutoCorrect Serial -string "12345-12345-12345-12345-12345"

MDM .mobileconfig profile - Allows AutoCorrect access to the keyboard to allow corrections. Example [here](#).
